

**You are invited to a Talk in the
Series of Winter Lectures**

To be given by Julian Lea-Jones, FRAeS

on Friday 1st April 2011

At 7.15 pm in Room 4 at BAWA

' Grow your own aircraft'

Science Fiction or future fact?

In his Talk Julian Lea-Jones will give a brief overview of a small selection of 'Future Now' developments, the first of which was only announced by Imperial College last month.

He will then go on to focus on the exciting development of 'Additive Layer Manufacturing, particularly where this applies to the Aerospace Industry.

Factory of the Future ?

"Imagine entering an empty factory space with a gantry inside and an iPad workstation. Imagine touching a button on this iPad marked 'grow wing'. Imagine coming in 12 hours later and finding a fully sized wing, complete with internal fuel tanks, flaps and other moving parts all ready for installation." Tim Robinson, Editor Raes, Aerospace International July 2010

**Julian Lea-Jones will show us that these developments
are not Science Fiction, but 2011 reality**

**BAWA Room 4 at 7.15 pm on Friday 1st April 2011
Bring your friends**
